

WG 5: Programme of Measures for 2022-2027

Session 1

- **Theme of the Session: Preparation of next program of measures and using EU indicators for key type of measures, KTM, to measure progress.**
- Suggested issues:
 - **Process for updating program of measures** including description if the indicators for KTM is relevant for describing progress with measures in river basins?
 - **Lessons learned from collecting data** for indicators for pressures, KTM and indicators for KTM
 - Other for example planning measures in a changing climate, coordination with MSFD and FD, planning measures such as riparian zones

Summary

- Differences between the Nordic Countries who is responsible for implementing the measures
- Differences on the level of measures (some more detailed than other)
- Similar challenges on how to target the measures to the most cost efficient areas
- Measure library:
 - Comparison between Nordic countries

Electronic PoM:

- Denmark will use the electronic PoM (+ pdf)
- Sweden will use electronic and paper PoM
- Finland will most probably use electronic PoM; the decision will be made during the summer.
- Norway and Iceland will use paper versions
- Cooperation continues
